GV Series Gasoline Vacuum

No Power? No Problem!

Ruwac's GV Series Gasoline Vacuum is performance and portability at its finest. Designed for maximum versatility, the Gas Vacuum is ideal for applications that require all the performance of a rugged, high quality vacuum without the restrictions of cords and plugs.

Featuring heavy duty casters and an ergonomic frame, our GV's offer complete portability. A sturdy base and full handle bar provide easy maneuverability over rough terrain and to remote locations.

At Ruwac, we understand that functionality is key. That's why our vacuums offer a filter shaker assembly and a foot-actuated drop down dustpan for easy cleaning. Just shake, step, pull and empty. Regular cleaning practices allow for prolonged filter longevity and improved vacuum performance.

If you're working with fine dust or powders, you need filtration you can depend on. Each of our Gasoline Vacuums is equipped with an oversized, state-of-the-art MicroClean filter that's 99.9% efficient at .5 micron. For applications that require absolute filtration, we also offer extra large, DOP tested and certified HEPA filtration assemblies, that are 99.99% efficient at .3 micron.

For reliability and performance, trust in Ruwac. Applications without power? It's no problem for our GV Series Gasoline Vacuum.

Technical Data	GV 5	GV 10	GV 15
Horsepower	5.5	10	15
Vacuum Pressure (Hg")	5.7	7	6.8
Air Movement (CFM)	180	300	630
