

RoughTerrain Caster Assembly For Any Ruwac Portable Vacuum

Making Portability Easier.

Tired of getting stuck in the mud? A portable vacuum is a great asset to a jobsite, but not if it can't move to where you need it. When working on uneven ground, it's easy to get stuck and frustrated. We've got a solution to your problem.

Introducing the RoughTerrain Caster Assembly for Ruwac portable vacuums. Attachable to any Ruwac vacuum system, these large rear wheels give "going the distance" a whole new meaning.

Request Part # 31848A

Stop getting stuck in gravel or rocks. Ruwac's RoughTerrain Caster Assembly easily attaches to portable machines to allow the greatest range of movement, over rocks, gravel, debris, cords, or any rough terrain you may encounter.

Make movement effortless. With large rear wheels, you can now easily roll over any obstacles without the hassle of heavy lifting. Two, heavy duty 10 inch solid wheels, with 550 lb. capacity, are easy to install to any Ruwac WNS, WS, DS1 or AV model vacuum.

Easily move between jobs or jobsites, regardless of location. Small casters make stairs impossible. Now you can quickly pull your portable vacuum up steps with minimal effort, saving time and your back.

Installation is easy! With a few tools, simply attach the wheel kit, remove the rear casters from your portable vacuum, and set your sights on rough terrain!
